Goiânia, 27th September 2010

To whom it may concern,

Gunjan Bansal has been an special student in our Organization. Although having his proposal dismissed at Google Summer of Code 2010 due to the lack of slots, Gunjan never gave up and volunteered for the Umit Summer of Code 2010 program where he showed himself very worthy for the community, showing a strong sense of his duties, self management capability and very desirous to work hard and better.

Luís Antonio Bastião Silva was his mentor this year, and reported that he was our best student for Umit Summer of Code, and that he would have done a great job for Google Summer of Code if we had that slot available.

We also highlight that he is a very skilled and capable professional, showing initiative and creativity in all solutions he implemented during the program and we bestow upon him our highest recommendation in all professional areas we have dealt with him during the Umit Summer of Code 2010.
